SUMMARY

Backend engineer with 6 years building and operating cloud services. Owns systems end to end: design, delivery, on-call. Strongest in Python, distributed systems and the operational side of machine learning.

EXPERIENCE

Senior Backend Engineer · Northwind Cloud, Bengaluru 2022 - Present

- Led the migration of a monolith to 14 services on Kubernetes, cutting deploy time from 40 minutes to under 5.
- Built an event pipeline on Kafka handling 120k messages/second at p99 < 80 ms.
- Introduced structured logging and SLO dashboards; halved mean time to detect.
- Mentored four engineers; ran the design review process for the platform team.

Backend Engineer · Crestline Systems, Pune 2019 - 2022

- Designed a multi-tenant billing service in Python and PostgreSQL serving 500000 accounts with zero data-loss incidents over three years.
- Cut AWS spend 31% by right-sizing workloads and adding autoscaling policies.
- Wrote the company's first CI pipeline; raised test coverage from 22% to 78%.

SKILLS

Languages Python, Go, SQL, TypeScript
Cloud AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, Terraform
Data PostgreSQL, Redis, Kafka, Elasticsearch
Practices CI/CD, observability, infrastructure as code, incident response

EDUCATION

B.E. Computer Science · Pune Institute of Technology 2015 - 2019
First class with distinction.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate 2021
Certified Kubernetes Administrator (CKA) 2023
